Profile

Computer Science B.Tech graduate (2026) skilled in Python, SQL, and data analysis. Built a CNN-based multimodal emotion recognition system using TensorFlow, Keras, and OpenCV, and a responsive portfolio website using HTML, CSS, and JavaScript. Strong problem-solving skills; seeking an entry-level role in software engineering or data.

Education

B.Tech in Computer Science, *ITER, SOA University* 2022 – 2026
Bhubaneswar

During my college days, I worked on several projects, including Robust Multimodal Facial Emotion Recognition Using Deep Learning Techniques, which helped me develop my problem-solving and analytical skills. Alongside my project experience, I gained knowledge of Python, SQL, DBMS, Java, JavaScript, and Computer Networks. I am passionate about working. As a fresher, I am eager to learn new technologies, gain practical experience, and contribute to an organization's growth.

Skills

Programming Languages
Python SQL Java JavaScript

Data Analysis
Pandas NumPy Microsoft Excel Power BI

Web
HTML5 CSS3 Responsive Web Design

Machine Learning
TensorFlow Keras OpenCV Scikit-learn CNN Deep Learning

Databases
MySQL MongoDB

Developer Tools
Git GitHub Jupyter Notebook Google Colab VS Code

Projects

Robust Multimodal Facial Emotion Recognition Using Deep Learning Present
Python, TensorFlow, Keras, OpenCV, CNN, Deep Learning, NumPy, Pandas, Scikit-learn

- Built a CNN-based multimodal model using audio, video, and text data to classify seven emotions: happiness, sadness, anger, fear, surprise, disgust, and neutral.
- Preprocessed images with OpenCV and trained the model on facial emotion datasets using TensorFlow and Keras.
- Evaluated the model using classification accuracy and other evaluation metrics.

Personal Portfolio Website Present
HTML5, CSS3, JavaScript, Responsive Web Design, Git, GitHub

- Built a responsive portfolio website showcasing technical skills, projects, and contact information.
- Implemented navigation and interactive elements with JavaScript; optimized layout for desktop, tablet, and mobile.
- Used Git and GitHub for version control.
